

Matthews Cataloging Services

Matthews offers a variety of ways to help your library streamline its acquisitions and cataloging processes. Through our partners and our own shelf-ready services, we will help get your library purchases on your shelves quickly and efficiently.

WorldCat Cataloging Partner Service

WorldCat Cataloging Partners is a new, enhanced service that merges the existing OCLC Cataloging Partners Program with the PromptCat service. Now when you order your new library materials from Matthews, WorldCat Cataloging Partners delivers corresponding OCLC MARC records with the materials. This service will help libraries get materials to users faster, improve cataloging efficiency and save staff time.

The WorldCat Cataloging Partner process is simple. First, order your materials from Matthews. Second, we transmit the lists of titles ordered to OCLC. Third, OCLC sets your library holdings in WorldCat. Lastly, OCLC delivers the library's records and reports and Matthews delivers your new materials at the same time. Also included is an electronic file of spine and pocket labels that can be delivered to the library or Matthews for shelf-ready materials.

MARCIVE, Inc.

Since the mid-1980's, MARCIVE Inc. has teamed up with Matthews to provide cataloging materials to library customers. Matthews has enjoyed a long relationship with MARCIVE, Inc., and has found their service easy to use.

Your library simply completes a profile indicating your specifications of cataloging. Once an order is processed with Matthews, we transmit ISBN numbers or other points to MARCIVE, Inc. After we receive the cards and/or spine labels from MARCIVE, Inc. we will ship them with your order. We can also use the materials for our shelf-ready services. Or, if you prefer, you may download the cataloging information directly from the MarciveWeb SELECT Program.

Shelf-Ready Processing

If you choose to use either the WorldCat Cataloging Partner Service or Marcive, Inc., Matthews can also delivery your books shelf-ready. Matthews offers fee-based shelf-ready processing according to your library's specifications. Processing can include application of spine label, property stamp(s), barcode label application/scan, security strip on print and multi-media products, due date slip, and more. Contact Ashley White at ashleyw@mattmcco.com for more information.

OCLC's TechPro Service

If you are currently an OCLC TechPro customer, or wish to be, Matthews can have your books shipped directly to TechPro. Our staff will physically check your orders in our warehouse to ensure accuracy before shipment—saving your library both time and money.
